

PV-19-capped · 5,526 images · 19 classes · 993 leaf groups
leaf-safe, hash-locked · dataset_id pv19-capped-62b5b2119fb2

group-safe split (no leaf group or SHA-256 crosses splits)

Train pool
3,797 images · 70%
client partitions drawn here only

Development validation
879 images · 15%
used during FL rounds

Final test · SEALED
850 images · 15%
evaluated once per finished slice

Dirichlet $\alpha = 0.1$ or 0.5 , or IID · five partition seeds

five software silos · images never leave the client process

Client 0
